About Otsuka

Otsuka Electronics Co., Ltd. was established in 1970. Today, we have 165 employees and annual revenues over 5 billion Yen. We manufacture instruments for optical evaluation/inspection of flat panel displays and constituent materials, as well as various medical equipment and clinical diagnosis equipment and related software.

Our customers include LCD-related companies, medical, academic, and governmental institutions. Regarding FTIR applications, customers are semi-conductor industry and gas manufacturing companies.

Why Enformatic

Enformatic has skills to design and make FTIR measurement and analysis software, and knows how customers or we want to use it. We decided it was the best way to outsource with Enformatic when Otsuka started to develop own FTIR software.

Enformatic development team led by Bartoz Maslanka, Tomasz Siwarga, and Tomasz Kot constitutes a powerful personnel resource which enables us to make the software programs that Otsuka requires.

Enformatic is providing us with the following:

- Software development using Microsoft technologies and tools.
- Remote development and testing capability.
- Custom made, Internet based project management tools.
- Custom made, Internet based software resources translation tools.

Yoshihiro Osawa.
